Knowledge Bowl is the name for several interdisciplinary academic quiz bowl-like competitions across the United States. The Mescalero Knowledge Bowl is organized under the direction of Region IX Education Cooperative. The competitions use questions that strengthen academic concepts found in the New Mexico Standards for Excellence, and basic knowledge questions from all curricular areas. Each team consists of four players with alternates. Questions are a combination of multiple choice, calculation, open ended, and fill in the blank. They require high level thinking skills and are grade appropriate. Our Vision at Mescalero Apache Schools is to prepare for a life path of learning utilizing interscholastic competitions that are played as much as athletic games.
